

MEGABLOX 777

Megablox is 1X2gaming's latest **instant win** release, and presents a fresh take on a the classic fruits style with plenty of opportunities for players to strategise.

During the base game, a maximum of **10** individual three-symbol mini games appear on a given spin. However, if the player lands a larger set of symbols, they can replace multiple mini games at once. These larger games are more volatile, and these different, random combinations of large symbols and mini games mean every spin's volatility is unique.

Like what you see on the reels? Megablox's special feature allows you to **lock in** a combination of reels / mini games for a maximum of **five spins**!

Megablox represents a new concept for 1X2gaming, but the gameplay is intuitive, and easy to pick up in less than **10 spins**.

The slot's classic symbols designs, alongside a striking symbol hierarchy, keep the fruits nostalgia alive despite this innovative format.

The varying volatility levels, especially when affected by player choices, opens the game up to a broad range of player categories.

*RTP: 95%

Volatility: Medium

Min. Bet: 0.20

Min. Bet: 50

Max. Win: 10,000 EUR
