

INCA IDOLS

INCA IDOLS

Dive into the wilds of the Amazon with **1X2gaming's** first **clusters** slot; the second clusters slot released under the 1X2 Network following Solar Nova from Iron Dog Studio.

The game plays on a **6x6** board, with players landing **five symbols** in a cluster for a payout. Inca Idols combines the clusters format with a host of **tumble mechanics**, providing a visually appealing gaming experience. Also adding to the player experience is the ability to change their 'character' as they please. Each tumble on a given spin activates a **multiplier** affording players greater wins. The slot includes **scatter symbols**, providing a further opportunity for payouts, with scatters also **guaranteeing wins** during feature / free spins.

Landing five scatter symbols takes the player into **freespins**, which includes **giant wilds**, either 2x2 or 3x3 on the board, as well as possibilities to land **additional wilds**.
