## FIREWORKS

Crashout - Fireworks presents not only an original and exciting addition to the 1X2gaming offering but also a new concept in the iGaming market. Crash games have seen a boon in popularity in the last few quarters, and this title from 1X2gaming adds a **social multiplayer** element to the players' experience.

Crash game mechanics are a unique experience in any casino lobby, fully centralising the gameplay on **player choice**. In Crashout - Fireworks, players follow the titular rocket as it soars through the sky towards its inevitable explosion. As it flies, the firework pushes the multiplier up with it, exponentially multiplying players' stakes before crashing.

Crashout - Fireworks provides players with an **intuitive user interface**, at the centre of which is a dual betting console, where players can set **auto-bets** and **auto-cashouts** as well as easily increase their bet via quick **x2 / x5 multipliers**.

This UI also includes a **chat box with a host of emoji reactions** for players to enjoy; as well as tracking of previous multipliers, biggest wins, overall bet history, and the individual **player's bet history** for that session.
