Set in Transylvania as the moon grips to the highest peak of the night sky, Blood Queen is the uprising release that brings thrills far-exceeding Halloween. Play as the love-hate relationship between Van Hell and our Blood Queen Ivanka unravels on your screen.

Big pays from the Vampire, the Stake and the Queen's Ruby alongside our two main characters are boosted with expanding Gargoyle wilds that surge down the screen to reveal more enticing pays.

The game's main features, barring its stunning graphics and truly immersive sounds that feel as though they have come straight from a classic Hollywood horror movie, are a choice of free spin rounds for the user with awards of up to 50 free spins to keep the chills coming.

During the seductive free spins round, users get to side with our budding hero Van Hell or with the rivalling Vampire Blood Queen herself bringing them further under her appetising allure.
